

## EURASIAN CARDIOLOGISTS ASSOCIATION INFORMATION LETTER

**Dear Colleagues,**

Cardiovascular diseases remain the most serious problem for healthcare in both developing and developed countries of the world. They are the main and the most serious causes for high morbidity and mortality levels in most countries resulting in great human losses.

So, according to WHO, circulatory system diseases are the cause for low lifespan and high mortality of able-bodied people today. In this situation, the influence of risk factors on mortality growth caused by circulatory system diseases is significantly higher in males in spite of improvement of the medical equipment and advances in prevention and treatment of cardiovascular diseases. Arterial hypertension and coronary heart disease play the leading roles among causes for population mortality and restriction of working capacity.

The improvement of the aid to patients with cardiovascular diseases is rightly recognized as one of the priorities for healthcare development. The whole world community makes great efforts in searching new solutions of this problem.

The Eurasian Cardiologists Association became the most large-scale international public scientific medical union making a significant contribution in professional development of medical practitioners in the Eurasian region, as well as introduction of the most up-to-date approaches in diagnostics and treatment of socially significant cardiovascular diseases; it also promotes the enhancement of medical aid quality to the population.

The participation of the leading cardiologists of the former Soviet Union and beyond in the congress will make it possible to consider in detail complex problems of prevention, diagnostics and therapy of cardiovascular diseases what, undoubtedly, will be a great contribution to the development of modern healthcare in our countries.

International congresses held by the Eurasian Cardiologists Association provide a good opportunity for scientists from different countries to exchange opinions, discuss complex and unsolved problems, coordinate further fields for studying the most important cardiology problems within the limits of joint investigations. Your active participation, experience and professionalism each time allow to organize interesting, rich and urgent educational programs.

The VII Eurasian Congress of Cardiologists will be held on May 17-18, 2019 in the city of Tashkent (Uzbekistan). The Eurasian Cardiologists Association, along with Association of Cardiologists of the Republic of Uzbekistan, invite you to participate in the work of the forthcoming congress. The scientific program of the VII Eurasian Congress of Cardiologists includes cardiologists' schools, scientific and practical symposia, and a competition for young scientists.

I hope that the work of the congress will be productive and provide new opportunities for you for cooperation in this field of medicine.

I am sure that the VII Eurasian Congress of Cardiologists will promote strengthening of cooperation, friendship and mutual understanding between the peoples of our countries.

I wish all congress participants the successful and fruitful work!

*Yours sincerely,  
General Secretary of the Eurasian Cardiologists Association,  
MD, Prof. S.N. Nakonechnikov*
